

Pore Clogging Ingredients in Skin Care

Do not ever put anything on your skin or your hair without checking the ingredients first, even if it says “Won’t Clog Pores” or “Non-Comedogenic” on the bottle. No government agency oversees this, so skincare companies can claim their products promote clear skin and have pore cloggers in their ingredient deck. Below is a list of ingredients to avoid in all skin care, acne care, makeup, and hair products.

Warnings:

- Natural oils can be some of the worst offenders, like cocoa butter and coconut oil which are found in many “organic” skin care lines.
- Other oils such as jojoba, olive, and lanolin are mildly comedogenic and can be a problem if formulated with other comedogenic ingredients.
- Some prescription products like the cream form of Retin-A have pore cloggers. Many over-the-counter acne medications also have pore clogging ingredients.
- “Oil-free” products can be comedogenic.

Makeup

- Loose powder, mineral make-up tends to be the safest choice, but still should be checked.
- Bare Minerals Original Formula loose powder foundation is a safe choice; however, the newer Bare Minerals Matte is NOT a safe choice—it contains soil minerals. We do not recommend any of the pressed Bare Minerals blushes, bronzers, or veils.
- Any pressed or liquid products should also be checked for pore-clogging ingredients.
